

# SUPRAKASH DHAR

## FULL STACK DEVELOPER

Whitefield, Bangalore, Karnataka

### SUMMARY

A motivated developer and problem-solver with proven experience in competitive and collaborative environments. Winner of two hackathons, including a solo podium finish in a competition dominated by team-based participants, competing alongside experienced industry professionals. Strong interest in building practical solutions, learning new technologies quickly, and applying analytical thinking to real-world challenges. Actively focused on improving technical skills through hands-on projects and hackathons.

### PROJECTS

#### Life Admin AI (**Hackathon Winning Project**)

Jan 2026

LifeAdmin AI is a blockchain-based self-accountability platform where users commit to tasks by staking funds on themselves. Each task is minted as an NFT, with proof-based verification determining refunds or forfeiture, ensuring transparency and discipline.

Live Website: <https://life-admin-ai-five.vercel.app/>

#### LegalEase AI (**Hackathon Winning Project**)

Dec 2025

Intelligent legal clause comparator using Airia AI — identifies risks, summarizes differences, suggests balanced terms, and flags fake or manipulated contract language.

Live Website: <https://suprakash-dhar-pw.github.io/contract-ai/>

#### Tech Club Website

Jan 2026

Designed and developed a responsive tech club website to showcase events, announcements, and member activities. The platform serves as a central hub for updates, engagement, and collaboration within the club.
